(54) 【考案の名称】 ブリーフ型の使捨ておむつ

(57)【要約】

DEST AVAILABLE COPY

【目的】 ブリーフ型のおむつに於て、標準サイズより もウエストの細い使用者が装着した場合にも、確実にフィットした装着を行う。また、使用後は、コンパクトに 丸めた状態での廃棄を可能とする。

【構成】 ブリーフ型に形成した使捨ておむつ15に於て、おむつ15の外面層4の外面に止着テーブ11の一端を固定する。この止着テーブ11の他端側に設けた貼着部13を、離型テーブ12で被覆する。また、使用時には、貼着部13を、使用状態に応じて形成した折込部16を維持するよう外面層4の外面に貼着する。

【実用新案登録請求の範囲】

【請求項1】 表面層と外面層の間に液吸収性の吸収層 を設けてなるブリーフ型の使捨ておむつに於て、おむつ の外面層の外面に止着テープの一端を固定し、この止着 テープの他端側に、外面層への止着を可能とする貼着部 を離型テープで被覆して形成し、この貼着部を、使用状 態に応じて形成した折込部を維持するよう外面層に貼着 可能とした事を特徴とするブリーフ型の使捨ておむつ。

【請求項2】 外面層は、液不透過性の防滯層である事 を特徴とする請求項1のブリーフ型の使捨ておむつ。

【請求項3】 外面層は、防瀾層の外面を被覆する不識 布体である事を特徴とする請求項1のブリーフ型の使捨 ておむつ。

【請求項4】 止着テープは、外面層に固定するターゲ ットテープを分離可能に貼着し、このターゲットテープ を介して貼着部を繰り返し貼着可能とした事を特徴とす る請求項1のブリーフ型の使捨ておむつ。

【請求項5】 止着テープは、外面層の外面に固定した 補強フィルムに貼着部を繰り返し貼着可能とした事を特 徴とする請求項1のブリーフ型の使捨ておむつ。

【請求項6】 止着テープは、外面層の腹側の外面に固 定した事を特徴とする請求項1のブリーフ型の使捨てお むつ.

【請求項7】 止着テープは、外面層の背側の外面に固 定した事を特徴とする請求項1のブリーフ型の使捨てお むつ。

【請求項8】 止着テープは、外面層の側面の外側に固 定した事を特徴とする請求項1のブリーフ型の使捨てお

【請求項9】 止着テープは、一本により形成した事を 30 特徴とする請求項1、6、7または8のブリーフ型の使 捨ておむつ。

【請求項10】 止着テープは、複数本により形成した 事を特徴とする請求項1、6、7または8のブリーフ型 の使捨ておむつ。

【請求項11】 折込部は、ウエストギャザー部の外面 層に形成した事を特徴とする請求項1のブリーフ型の使 捨ておむつ。

【請求項12】 折込部は、ウエストギャザー部以外の 外面層に形成した事を特徴とする請求項1のプリーフ型 40 17 ターゲットテープ の使捨ておむつ。

【図面の簡単な説明】

【図1】 複側の外面層に1本の止着テープを形成した状 熊を示す本考案の第1実施例の斜視図である。

【図2】背側の外面層に1本の止着テープを形成した状 態を示す第2実施例の斜視図である。

[Title of the design]

Briefs type disposable diaper
[Abstract]

[Object] In a briefs type diaper, to put the garment on with a reliable fit even when worn by a user whose waist is thinner than the standard size. Furthermore, to permit disposal after use in a compact roll form.

[Constitution] In a disposable diaper 15 which is formed as briefs, one end of a fastening tape 11 is secured to the outer surface of an outer surface layer 4 of the diaper 15. An adhesion portion 13 which is provided at the other end of the fastening tape 11 is covered by a release type tape 12. Further, during use, the adhesion portion 13 is adhered to the outer surface of the outer surface layer 4 such that it maintains folded-in portions 16 which are formed according to the state of use.

[Scope of the utility model registration claims]

[Claim 1] Briefs type disposable diaper which is provided with a liquid absorbing absorbent layer between a top surface layer and an outer surface layer, characterized in that one end of a fastening tape is secured to the outer surface of the outer surface layer of the diaper, an adhesion portion which permits fastening to the outer surface layer is formed at the other end of the fastening tape by covering with release-type tape, and the adhesion portion can be adhered to the outer surface layer such that it maintains folded-in portions which are formed according to the state of use.

[Claim 2] The briefs type disposable diaper as claimed in claim 1, characterized in that the outer surface layer is a liquid impermeable leak resistant layer.

[Claim 3] The briefs type disposable diaper as claimed in claim 1, characterized in that the outer surface layer is a nonwoven fabric covering the outer surface of a leak resistant layer.

[Claim 4] The briefs type disposable diaper as claimed in claim 1, characterized in that, with regard to the fastening tape, a target tape which is secured to the outer surface layer is adhered such that it can be separated, and the adhesion portion can be adhered repeatedly via the target tape.

[Claim 5] The briefs type disposable diaper as claimed in claim 1, characterized in that, with regard to the fastening tape, the adhesion portion can be adhered

repeatedly to a reinforcing film which is secured to the outer surface of the outer surface layer.

[Claim 6] The briefs type disposable diaper as claimed in claim 1, characterized in that the fastening tape is secured to the outer surface on the belly of the outer surface layer.

[Claim 7] The briefs type disposable diaper as claimed in claim 1, characterized in that the fastening tape is secured to the outer surface on the back of the outer surface layer.

[Claim 8] The briefs type disposable diaper as claimed in claim 1, characterized in that the fastening tape is secured to the outer surface on the side of the outer surface layer.

[Claim 9] The briefs type disposable diaper as claimed in claim 1, 6, 7 or 8, characterized in that the fastening tape is formed from one strip.

[Claim 10] The briefs type disposable diaper as claimed in claim 1, 6, 7 or 8, characterized in that the fastening tape is formed from a plurality of strips.

[Claim 11] The briefs type disposable diaper as claimed in claim 1, characterized in that the folded-in portions are formed in the outer surface layer of the waist gather portion.

[Claim 12] The briefs type disposable diaper as claimed in claim 1, characterized in that the folded-in portions are formed in the outer surface layer other than the waist gather portion.

[Brief description of the diagrams]

[Figure 1] is an oblique view of a first embodiment of the present design showing the state in which a single strip fastening tape is formed on the outer surface layer of the belly.

[Figure 2] is an oblique view of a second embodiment showing the state in which a single strip fastening tape is formed on the outer surface layer of the back.

[Figure 3] is an oblique view of a first embodiment showing a state in which a double-strip fastening tape is formed on the outer surface layer of the belly.

[Figure 4] is an oblique view of a fourth embodiment showing the state in which a double-strip fastening tape is formed on both sides of the outer surface layer of the belly.

[Figure 5] is an oblique view of a fifth embodiment showing the state in which a single strip fastening tape is formed on the outer surface layer of the waist gather portion of the belly.

[Figure 6] is an oblique view of a sixth embodiment showing the state in which a target tape is formed on the outer surface layer of the belly.

[Figure 7] is an oblique view of seventh embodiment in which the outer surface layer is a nonwoven fabric covered by a leak resistant layer.

[Figure 8] is an enlarged cross section of a fastening tape showing the state in which the adhesion portion is covered with a release-type tape.

[Figure 9] is an enlarged cross section of the fastening

tape showing the state in which the adhesion portion has been opened out from the release-type tape.

[Figure 10] is an enlarged cross section of the fastening tape showing the state in which the folded-in portions are secured.

[Figure 11] is an oblique view of a diaper showing the state in which one end has been rolled.

[Figure 12] is an oblique view showing the state before securing the rolled diaper.

[Figure 13] is an oblique view showing the state in which the rolled diaper is secured to the outer surface layer of the rolled-up side using the fastening tape.
